

IPMS Prison City Modelers

Leavenworth, Kansas
November 2013

SCUTTLEBUTT FROM THE PRESIDENT:

I hope everyone is having a productive fall as the weather turns cooler and pushes us all indoors. We have a very important meeting this month as we will be taking nominations for next year's club officers. If you would like to nominate someone (including yourself!) for president, vice-president, secretary, or treasurer, please make sure you attend the meeting and let your voice be heard! After taking nominations this month, we will hold elections next month (in December.)

Also, please bring your ideas for a theme for next year's contest. This is really the last bit of "long term" business we need to take care of for next fall's event.

Hope to see you at the library this Wednesday! Bring your officer nominations along with whatever you've been working on!!

Hope to see you Wednesday at the library!
Shane Curtis

FROM THE SECRETARY: We need Nominees! Interested in having a say in where the club is going? Then run for the board. Please contact Mark to have your name added to the ballot. Voting is in December—positions are President, Vice-president, Treasurer, and Secretary.

VETERAN'S DAY ARTICLE ON MODELING: Our own Ed Burgess was interviewed for a Veteran's Day piece on hobbies, and in particular World War I modeling and modeling in general by *Library Journal*. You can read the entire article at: <http://reviews.libraryjournal.com/2013/11/in-the-bookroom/a-veterans-day-conversation-on-hobbies-modelling/>

WORKS IN PROGRESS:

Some works in progress from Ed Burgess. Ed says that the first one is a Trumpeter kit of the SA-2 Guideline missile and launcher. Not a bad kit, no fit issues. Finished kit is very fragile and wobbly, which may be partly him but is at least partly it.

The other is Tatiana's vanship, from the anime series The Last Exile. Hasegawa kit, a joy to assemble, the parts fit like a pocket watch. Series is available on YouTube.

HELP NEEDED! Need some B-17 parts? I have a completely finished 1:48th scale B-17 by Revell. I finished it about a decade ago, but have gotten tired of dusting it. The landing gear has failed, but if you want to kit to take apart and reuse for new projects, it is yours. Just contact Mark Gerges. If no one wants it, it is going in the trash shortly.
